

turn paperwork into paper that works

Extend the value of MFPs and office scanners
with new document imaging solutions from
eCopy and Canotec

turn paperwork into **paper that works**

Bring paper documents into the digital world

eCopy document imaging solutions easily and securely transform paper into business value using infrastructure that is readily available in any office – multifunction printers and copiers (MFPs) or network-attached scanners.

With an eCopy solution deployed, operational efficiency and business productivity improve dramatically. Energy expended in finding, copying, sorting, routing, filing, and securing hardcopy documents can be put to better use. Time wasted chasing paper becomes time invested in meaningful work that contributes to bottom-line profitability.

Increased productivity is only part of the story

A consistent, easy-to-use document imaging process based on a single software platform improves operational efficiency by letting you...

- Unlock paper-based information so it can be included in business software systems
- Consolidate paper and electronic processes into a single workflow
- Stop spending time and money delivering hardcopy information
- Ensure security, business continuity, and compliance
- Enable workgroup collaboration without the paper-bound constraints of time or distance

eCopy's open architecture is supported across any MFP or scanner, so a document imaging solution can be matched to the office equipment of choice. That means with Canotec our customers can have one, standardised scanning interface across their existing and future multi-functional platforms. Standardisation and rationalisation without being beholden to the MFP manufacturer.

eCopy... how so many Canotec customers are making paper work!

eCopy is Canotec's single most popular and proven scanning and document capture solution ever! With over **40%** of our customers now eCopy evangelists themselves and with over 300 installations, we have no shortage of success stories to share with you on how we can help you turn paperwork into paper that works.

Canotec however are not just resellers of this ground breaking document scanning and routing solution. Canotec has a long and unique history with eCopy having *launched* eCopy in the UK in 2001 before going onto be developers and solutions integrators. Our team of eCopy engineers, systems integrators and eCopy connector developers allows us to offer unparalleled levels of integration, flexibility and simplicity for our customers

From the personal document imaging of eCopy

Desktop™ to the functionality of eCopy ShareScan® Essentials™ for small businesses and workgroups to the robust enterprise capabilities of eCopy ShareScan® Suite™, there is an eCopy solution for every need and every size of Canotec customer.

The eCopy solution stack is built for growth – enabling you to choose a starting point that best fits your business and add more features to what you already have. With eCopy's library of connectors, of which Canotec is a key developer partner, you can achieve native integration with the networked enterprise applications that are most important to your business or organisation.

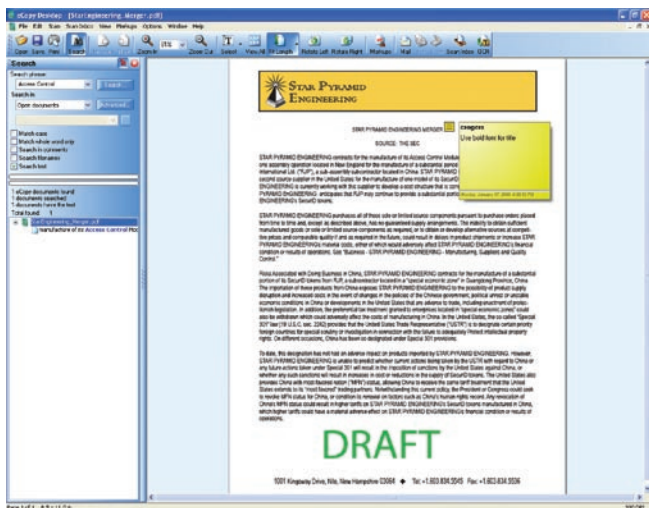

eCopy document imaging solutions are designed as building blocks. The basic functionality for capturing, creating, and editing documents extends across eCopy Desktop, ShareScan Essentials, and ShareScan Suite. ShareScan Essentials adds versatile document distribution capabilities, while ShareScan Suite enables the integration of paper-based information into electronic business processes.

The Canotec eCopy team, offer free advice on what fits your needs and budgets best.

turn paperwork into **paper that works**

eCopy Desktop... for personal productivity

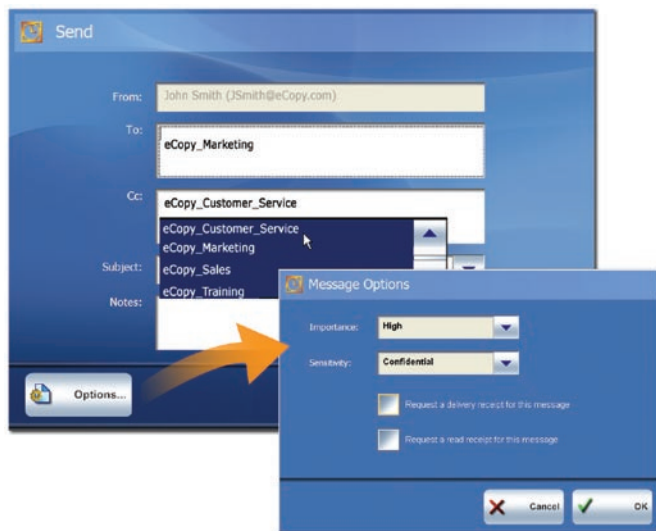

Capture, combine, secure, and edit scanned documents

eCopy Desktop PC software turns everyday tasks into routine processes that take less time, involve fewer steps, and enable office workers to accomplish more.

- Transform paper documents into secure electronic PDF files that can be manipulated at the user's desktop
- Combine with other paper and electronic documents
- Share or store over the network or on the user's PC

ShareScan Essentials... for workgroups, departments, and small businesses

Turn a networked MFP or scanner into a shared document capture device

ShareScan Essentials provides an easy-to-use interface that is embedded within the MFP and makes secure document imaging available to any office worker.

- Capture paper-based information and distribute directly from any MFP
- Scan to network file folders, fax, and eCopy Desktop
- Connect to Microsoft Exchange/Outlook and IBM Lotus Notes e-mail

Integrate with business software

ShareScan Essentials is integration-ready, enabling the use of paper document content in leading business applications just by adding the appropriate plug-in connector.

ShareScan Suite...

for enterprise business process efficiency

Integrate paper-based information into multiple business applications

Achieve greater business efficiency

ShareScan Suite provides out-of-the-box connectivity to applications and seamless integration with custom workflows and databases through the versatility of eCopy Quick Connect™ scan-to buttons.

ShareScan Suite is available as embedded software on some MFP models and also runs on eCopy ScanStation™, which includes a keyboard and large touch-screen monitor, and attaches to a wide array of MFPs and scanners.

80% of Canotec customers prefer eCopy scanstation due to it's increased size, simplicity and fast functionality. Especially if the eCopy services are shared on a busy departmental copier or printer.

ShareScan Suite enables mid-size, large, and enterprise-class organizations to work securely and seamlessly with familiar business applications.

- Convert paper documents into electronic files for immediate distribution or storage
- Integrate with any software, network repository, content management, or document accounting system
- Centralize IT administration and leverage investments in MFPs, scanners, and software applications

ShareScan Suite offers the broadest and deepest compatibility with Microsoft technologies, including...

- Microsoft Exchange/Outlook
- Microsoft SharePoint
- Microsoft Windows Active Directory
- Microsoft Dynamics
- Microsoft SQL and Access
- Microsoft Management Console (MMC)
