

## New canotec service centre

**Canotec's new service and IT support centre opened at the end of 2006 and the team swiftly took top honours as the new service centre for the South for HP. The 3,500ft dedicated facility is the support nerve centre for our Southern region team and first point of contact for all of our customers.**

Anita Fox, Canotec's head of service call management, said:

"It is a great facility with more than £100,000 of spares and emergency parts. We have a new service management system and high targets to achieve in service support on behalf of our customers. Any prospective customers looking for peace of mind and an idea of what we deliver in support, day after day, should come and see the service centre as part of their evaluation of Canotec."
